PROFILE SUMMARY

BE Computer Engineering student with a strong foundation in programming (C, C++, Java) and web development. Passionate about problem-solving and software development. Quick learner with a keen interest in technology and innovation. Adept at working in collaborative environments and continuously improving technical skills to adapt to emerging trends in the industry.

EDUCATION

Dr. D. Y. Patil College of Engineering and Innovation
(Bachelor of Engineering in Computer Engineering)

CGPA: 7.96

Shivaji Polytechnic College
(Diploma in Computer Engineering)

Percentage: 87.61%

TECHNICAL SKILLS

Programming Languages: C, CPP, JAVA
Front-End Technologies: HTML, CSS, Bootstrap, JavaScript, React (Novice)
Back-End Technologies: Java Servlets, Spring Core, SpringBoot(Novice)
Database Management: MySQL Development, Basic SQL Queries
Tools: Eclipse, IntelliJ IDEA , VS Code, Apache Tomcat

EXPERIENCE

- Elite Softwares** 12/2023- 02/2024
Hands-on experience with the Django framework in a real-world project.Improved understanding of full-stack development, including integration of frontend and backend. Problem-solving in a social impact project.
- Java Full Stack Trainee** 09/2024-07/2025
Successfully completed Java FullStack training at Archer Infotech with hands-on experience in Java,MySQL,Spring, SpringBoot, Hibernate, ORM, Data JPA, React.js and foundational Python.
- Elevate Labs** 09/2025-11/2025
During this internship, i work closely with development team on projects that will enhance my understanding of core Java concepts, object-oriented programming, database integration, API development, and debugging techniques.

PROJECTS

A Cloud Based Solution Architecture for Placement Cell

- Developed a cloud-enabled web application to streamline and automate the college placement process.
- Proposed a scalable, secure, and cost-effective cloud-based solution architecture.

E-Learning Portal System(Web Application)

- Provide an intuitive learning experience for students.
- For frontend we used CSS,HTML,JavaScript. Allow instructors to author and manage content and assessments.
- Backend is done using PHP, Java and Python. Offer admin tools for monitoring, reporting, and user management.

Full Stack E-Commerce Website

- Tech: Java, Spring Boot, RESTful APIs, MySQL, HTML, CSS, JavaScript, React (Beginner)
- Developed a full stack e-commerce platform with product catalog, shopping cart, and secure checkout process.
- Implemented user authentication, role-based authorization (admin/customer), and order management using Spring Boot and REST APIs.
